

Boycott George Soros Assignment

The globalist cabal who are running the whole united nations push towards a global tyrannical technocracy is comprised of the 1% of the population who are also the richest families in the world. They are promoting the Agenda 2030 for world depopulation and a vaccine passport connected to the digital currency of the central bank. These are eugenicists who want 85% or more of the population of earth to be gone by 2030. How they are doing this is clear now - the vaccines are designed to kill the public like slow acting poison. George Soros is one of the more visible globalists who has had a long history of unethical behaviour. Most globalists do not pay any taxes on the money they obtain subsidies or bailout or simply write off debt through non profit societies. He funds groups like Antifa, LGPTQ, Blacklivesmatter, who are clearly marxist movements that encourage violent behaviour like burning buildings and removing monuments as a response to social change. Members who are arrested and sent to jail for these acts of violence and bailed out by the fund that George Soros set up through Antifa. George Soros has arrest warrants in many countries himself for his nefarious activities and cannot set foot in these countries. If there is to be change on this planet - we need to change - we need to stop willingly giving our money to the companies that are owned by these people. Lets start purchasing goods and services from other more ethical people. The assignment is to never shop at these companies nor do business with these people - if at all possible. Seek out other ethical people to spend your money. Here is a list of companies that are owned by George Soros.

Companies Owned By George Soros:
